

W. Hamann 1907

designed by jim kreativdesign

Truetype Font for windows 7,8,10,11

Thanks for downloading this truetype font!

This is a first beta version of this font I spent lots of hours to restore and create a new old style. I found a picture of a grave inscription in Poland from 1907 on social media from a young boy who died in 1907 with only 8 years. There was only the name of him "Wilhelm Hamann" (1899/01/27-1907/11/30) written in this beautiful old german blackletters what made it difficult to restore the hole alphabet in the correct form. That's why it is possible that there're any differents from the original alphabet. But I think this font was it worth to re-create and share it with the world.

I named this font "W.Hamann1907" in honor of the young boy.

Licence:

This font is allowed only for personal use! Copyright 2023 by jim-kreativdesign, all rights reserved. This is only a beta-version. For commercial use please contact me!

Install:

Unzip the downloaded file with win-rar, win-zip or any packing file program. Do a rightclick on the truetype font file "W.Hamann" and choose the Option "Install for every user". That's it!

Kerning problems known:

In this Beta-Version are kerning and display problems possible. Showing special characters (\$, (,), [,], numbers ect.) in programs like Open Office doesn't work, and after typing the kerning doesn't fit anymore. But I'll try to fix it the next time and update it as soon as possible. I hope you like this font and enjoy it!

Nice greetings

jim kreativdesign
